

This is My Story

WHI participants have told us that they would like to see:

- Questions about what works well for them as they get older
- Comment boxes on forms

WHI Team: Lesley Tinker, Marian Neuhouser, Tonya Orchard, Linda Van Horn, Sally Shumaker, Marcia Stefanick, Barbara Howard

Form 159 – Supplemental Questionnaire 2018

- Open-ended questions would provide a framework for responding and comment space limited to encourage brief responses.
- Examples:
 - List three things that you have found helpful in your approach to aging and if possible provide an example of each.
 - List up to three challenges you have faced while aging and have overcome including examples if possible.
 - What three tips on aging would you suggest for future generations?

Responses

- Investigate mechanism to capture written words!
- Qualitative research synthesis methods.
Examples could be individually highlighted.
- Alternate/additional approaches:
 - Semi-structured interviews (audio/video) with a smaller group of participants.
 - Focus groups
 - We are remembering the participant panels from the Legacy conference that were popular yet a selected number of participants were invited and accepted.
