Adjudicator Code: ___-___	Case Copy No.: ___

Use a separate form for each fracture.

Yes ₁ No ₀

1. **Confirmed hip fracture:** Fracture of the proximal femur, including fractures of the femoral neck, intertrochanteric region, and greater trochanter

1.1. Date of Diagnosis: ___ - ___ - ___ (M/D/Y)

1.2. Fracture site: **(Mark the one that applies best.)**

- | | |
|---|--|
| <input type="checkbox"/> ₁ Neck of femur (transcervical, cervical) | <input type="checkbox"/> ₃ Greater trochanter |
| <input type="checkbox"/> ₂ Intertrochanteric fracture | <input type="checkbox"/> ₄ Unspecified part of proximal femur |

1.3. Side of hip fracture: **(Mark the one that applies best.)**

- | | |
|---|--|
| <input type="checkbox"/> ₁ Right | <input type="checkbox"/> ₃ Both sides |
| <input type="checkbox"/> ₂ Left | <input type="checkbox"/> ₉ Unknown |

1.4. Hip fracture based on: **(Mark the one category that applies best.)**

- ₁ Written radiology report that is read by a radiologist and identifies the presence of a new, acute, or healing fracture of the proximal femur (femoral neck, intertrochanteric region, or the greater trochanter region) and documented on a discharge summary
- ₂ Radiologist's report confirms a proximal femur fracture, but the hospital discharge summary does not (or is equivocal or missing)
- ₃ All of the following:
 - 1) hospital discharge summary listing fracture of the proximal femur, femoral neck fracture, intertrochanteric fracture, trochanteric fracture, or hip fracture;
 - 2) equivocal written radiology report of the hip (e.g., "possible" or "probably" or "suspected" hip fracture); and,
 - 3) a written radiologist's report of either a bone scan or MRI scan unequivocally stating that a new hip fracture or healing hip fracture is present
- ₄ Hip fracture diagnosed in discharge summary, or other written report, but no radiology report available or radiograph not read by radiologist

1.5. Pathologic hip fracture: fracture resulting from bone tumors or cysts, Paget's disease, bone or joint prostheses, or surgical manipulation. Osteoporotic fracture is not considered a pathologic fracture. **(Mark the one category that applies best.)**

- ₀ No ₁ Yes ₂ Possible
